

Meritor Parts

The Meritor Company is a premier global dealer built upon one hundred years of tradition of quality and service. Meritor concentrates on integrated systems with a range of modules and components to the original machinery manufacturers and aftermarket equipment in the industrial and transportation trades. Meritor prides itself in the company's distinctive energy and feels that this energy contributes to their competitive advantage within the international operations. The company values all their customers and wants to guarantee their success while anticipating their different requirements. Meritor begins with a philosophy that values diversity of people and their broad thought processes. Operating in 19 nations and hiring over 11,200 individuals, Meritor encourages collaboration and innovation amongst a team of knowledgeable experts. Meritor strongly believes in just hiring future focused employees. These top-caliber people can quickly get used to to changing surroundings and freely exhibit the level of commitment and performance needed so as to attain results for the competitive market environment. The business empowers their teams to make sound business decisions so as to enhance the overall success of the company. In return, Meritor provides all of their staff different opportunities for professional and personal development. The Advanced Engineering team is on the forefront of components and system engineering. This comprises axles, drivelines, suspension and braking systems meant for medium and heavy duty trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is developing. They started a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives that represent the whole Asia Pacific region. This particular team is likewise responsible for supporting the requirements of their global engineering personnel. Meritor's dynamic and customer focused Quality team is devoted to ensuring optimum processing at their production plants and aftermarket distribution facilities that are located all over the world in 19 countries and in 5 different continents. The supplier development network is specially located to support new business development. Regional teams are supported by international quality systems, centralized specialties and initiatives in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a data-driven, fact-based approach to decision making in each and every aspect of the business. The DFSS or Design for Six Sigma ensures product reliability within each region. The team is even included transactional Green Belts who use Six Sigma tools to business methods and apply lean techniques.
