

Aerial Work Platforms

There are many accessories utilized for lift trucks that can be utilized in order to help expand the capabilities of your lift truck and allow you to pick up stuff, handle materials with less effort or to complete clean-up tasks.

Lots of the attachments are specially designed in order to fit on the blades themselves. Fork extensions for instance, are used if you require much more fork length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular accessories are another kind used whenever transferring rolled material to be able to make certain it does not roll off of the traditional flat forks.

Lifting attachments could be pivoting and telescoping crane accessories. They come in various kinds. These attachments are often utilized for moving metal bars, poles, lumber or any sort of bulky items. Additional attachments like for instance various kinds of hooks and hook plates are offered in order to carry stuff using a chain or sling. Magnetic lifters and slab lifters are other things that could be utilized with hook attachments. Slab lifters are specialized attachments that are used for carrying a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that attach to your lift truck to make transporting rolls of carpet easier. The attachment connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are various types of forklift attachment utilized for facility maintenance like for instance snow forks. These industrial forks could be attached to front end loaders and intended for moving materials like for example dirt, and mulch as well as snow. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers comprise a broom which the forklift blades connect onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and easy.

Material spreaders are other accessories used on lift trucks. These spreaders are useful for a range of applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting accessory are work platforms. These can be used by a lot of various companies on a daily basis. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several models may be offered and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location utilizing the forklift. Larger platform models have added space for staff to bring tools and other essential objects for the task. Usually work platforms are constructed of poly material or steel.
